DISTINCTIVE RIB PATTERN DESIGN

- Reduces rolling resistance, vibrations and prevents snaking

DEEP TREAD LUGS WITH HIGH PERFORMANCE COMPOUND

- Increases tyre life

UNIQUE LUGS WITH SIPES DESIGN

- Increases traction on low grip conditions

ENERGY-EFFICIENT RUBBER COMPOUND

- Helps reduce wear on heated airport apron surfaces

Remarks

(1) Consult tyre and wheel manufacturer for confirmation of the suitability of the tyre/rim combination particularly with regard to rim profile and wheel strength.

(2) The speeds quoted in the table are the maximum speeds of the unloaded vehicle. An increase in load capacity for lower speeds is not permitted. Loads apply to cyclic service applications. Cyclic service means applications where tyre are not used continuously at the load indicated by its Load Index and Speed Symbol. It does not refer to the length of time a vehicle is in use. but rather that there is a variation in load and/or speed.

* Tube size is identical to tyre size

** Table shows standard valves. Other valves on request.

NHS – Not for Highway Service: Tyres primarily designed for use outside of public roads, but suitable for temporary/incidental use on public roads.

All tyres come with tube and flap.
