

Takes your fleet further. And your performance, too.

Our new **Conti Hybrid HD5**.

German engineered high-mileage tyres.

- › Look forward to exceptional high mileage thanks to the new compound formula developed for regional operations.
- › Benefit from impressive traction in all weathers due to an extra-robust tread pattern including new full-width 3D matrix sipes.
- › Enjoy high casing protection and a great tread integrity by minimised stone-trapping enabled by void generating grooves and stone bumpers.

Generation 5. Together we make difference.

The new Conti Hybrid HD5.

German engineered high-mileage tyres.

These tyres' business is to move your business as far as possible.

Taking your business to the top can be a very long journey. So better rely on a partner, who will never let you down along the way: a partner like the brand-new Conti Hybrid HD5. This drive axle tyre allows your fleet trucks to cover very long distances. A new tread compound for the drive axle with superior binding properties - together with the usage of a distinctive type of carbon black - enables less internal friction and thus ensures ultra-high mileage. Moreover, thanks to the combination of two different innovative compounds for cap and base you can still benefit from a balanced-out good rolling resistance and fuel efficiency performance - which is more than just useful when you aim to make the most out of your business.

Get on the road and stay on track.

Prepare yourself to fully focus on your business, while we make sure you never get off-track on your way. The new Conti Hybrid HD5 has been designed to provide superior traction in all weather conditions - enabled by its extra-robust tread pattern including full-width 3D matrix sipes that ensure a top-level performance over the whole tyre lifetime - and just in case you already forgot: this means for a very, very long time.

Rely on tyres that give you peace of mind for years.

We want you to concentrate on things that really matter to you, without worrying too much about tyres. That's why we concentrated on things that matter to us: to provide a long and safe ride. With special void-generating centre grooves and small stone bumpers in all circumferential grooves, the Conti Hybrid HD5 minimises stone trapping and provides a high tread integrity and casing protection. So, once you thought of choosing the Conti Hybrid HD5, you are free to think of other things.

Tyre Size	LI/SI				M+S	
315/70 R 22.5	154/150 L (152/148 M)	C	C	B/76 dB	•	•
