

FG:01™ II

Designed for steer and all around fitment of vehicles used in construction site, features high resistance to laceration and grip in off-road and mileage on asphalt road.

Lateral and central grooves with a built-in step

Mileage

Grooves with built-in stepstone ejectors

Stone trapping prevention for high resistance to lacerations

Protection ribs on sidewall

Enhanced resistance to lateral impacts and abrasion

Regroove depth indicators at the groove base

Easy regrooving operations

Increased land to sea ratio

High performance on asphalt roads and mileage
